

Online Registration and Payment System “Tips”

2019 Website and Registration Changes

John McClelland 11/14/18

There have been a couple changes to the SCC Website (www.scottsdalecorvetteclub.com) and Registration process to prepare for the 2019 Calendar of Events.

SCC Website Changes –

The new SCC 2019 Calendar of Events has been posted to the “SCC Calendar” page under the “Calendar” Menu Tab

A new “2019 Activities” page has been created under the “Calendar” Menu Tab. This is similar to what we had this year on the “2018 Activities” page, but for all 2019 events.

Here is what it will look like on the SCC Website:

Registration on EventZilla –

In 2018 when you clicked the link in an announcement to sign-up, it brought you to the EventZilla Event Manager page in your browser to Register and Pay (if required). Once you selected your tickets, it would ask you to give your email, first and last name. This is considered the Buyer’s information. All communication going forward is only using the Buyer’s email address.

For 2019 we will be requiring the Buyer **and all Attendee** information when you sign-up on EventZilla. This allows us to communicate with all Attendees on things like Updates on the Event and Final Information and Itineraries just before the event. Again, in 2018 this only went to the buyer. There were some problems that the other person going on the event was not notified of this important information. Collecting all Attendee information allows us to communicate with both parties on all notices.

There is an option on Attendee 2 to just copy Attendee 1 information with a slide button. But then the other party will not receive notices.

One would think that EventZilla could have used the Buyer information as Attendee 1, but it doesn't, so you end up filling out 3 short forms for 2 Attendees. Most Browser will remember what you put into them the first time, and offer to auto-fill from then on, if you have the setting in the Browser configured. Then it goes very fast.

Here is what the 3 inputs look like:

The image displays three sequential registration forms for an event. The first form is titled "REGISTRATION INFORMATION" and contains three input fields: "Your Email Address *", "First Name *", and "Last Name *". The second form is titled "ATTENDEE 1 DETAILS - SCC JAN 13TH WRIGLEY MANSION - ENTER NUMBER OF PEOPLE GOING" and also contains three input fields: "Email address *", "First name *", and "Last name *". The third form is titled "ATTENDEE 2 DETAILS - SCC JAN 13TH WRIGLEY MANSION - ENTER NUMBER OF PEOPLE GOING" and includes a toggle switch labeled "Do you want to copy information from attendee # 1?" which is currently turned on. Below the toggle are three input fields: "Email address *", "First name *", and "Last name *".
